SKILLS

Programming: Java, JavaScript

Frontend: React, HTML, CSS, Tailwind

Backend: Java (Spring Boot), Node.js (Express)

Database: MongoDB, MySQL

Core: OOP, Computer Networks, Operating Systems, Data Structures and Algorithms

PROJECTS

LearnGen – AI Powered Learning Platform | *React.js, Node.js, Express.js, MongoDB, YouTube API, LLaMA 3*

- Reduced AI processing time by **60–70%** by implementing transcript caching and result reuse, preventing repeated **LLaMA 3** inference for previously processed videos.
- Automated **lesson and quiz generation** from YouTube transcripts using LLaMA 3, transforming unstructured video content into structured learning modules.
- Built scalable **REST APIs** using Node.js and Express.js to fetch, process, and store YouTube video data for efficient course management.
- Designed optimized **MongoDB schemas** for courses, lessons, and quizzes, improving data retrieval performance and reducing API response latency.

EXPERIENCES

–

–

ACHIEVEMENTS

Successfully completed a **Python project** within the given deadline demonstrating strong problem-solving and project execution skills.

EDUCATION

Sharnbasva University

B.Tech in Computer Science and Engineering (CGPA: 8.67)

Kalaburagi, India

2022 – 2026
